PHAMACEUTICAL

LCA range of services to our valued customer

- ❖ Own temperature controlled second line warehouse (PIL COL/PIL CRT) with refrigerated truck docking zone

LCA upgraded its range of services by obtaining Good Distribution Practice certification (G.D.P.). Based on a solid QMS (quality management system), high-performance equipment and complete monitoring, we are able to offer a full range of services such as transport, freight-forwarding, handling and storage for your pharmaceutical products or medical devices as from now. LCA has two modern and spacious refrigerated areas, including a 900 m² PIL COL area and a 2.400 m² PIL CRT area.

Achieving this certification did not happen by chance. LCA had to prove its capabilities in temperature monitoring, risk management, implementation of preventive measures and its training program.

Already very active at Liege Airport, this new challenge allows LCA to increase its leadership, and offers customers the guarantee of a quality service, mastering every critical point in the supply chain.

In the heart of Europe, benefiting from road facilities, in a bonded warehouse, regulated agent, this certificate is the assurance of meeting the highest global standards in the handling of pharmaceutical shipments.
